VOLUME 43 (1990)

Special Issue: Sedimentation and Creaming. Papers Presented at the Society of Chemical Industry Meeting, London, United Kingdom, 10 November 1988

Experimental techniques for monitoring sedimentation in optically opaque suspensions
R.A. Williams, C.G. Xie, R. Bragg and W.P.K. Amarasinghe (Manchester, United Kingdom) 1
The sedimentation of concentrated colloidal suspensions
R. Buscall (Runcorn, United Kingdom) 33
Theory of sedimentation in colloidal suspensions
G.C. Barker and M.J. Grimson (Norwich, United Kingdom) 55
Sedimentation in polydisperse particulate suspensions
D.J. Wedlock (Sittingbourne, United Kingdom), I.J. Fabris (Silsoe, United Kingdom) and J. Grimsey (Sittingbourne, United Kingdom) 67
Determination of gravitational separation in dispersions from concentration profiles
A.M. Howe and M.M. Robins (Norwich, United Kingdom) 83
Viscoelastic properties of aqueous concentrated pesticidal suspension concentrates
Th.F. Tadros and A. Zsednai (Bracknell, United Kingdom) 95
Application of depletion flocculation for prevention of formation of dilatant sediments
Th.F. Tadros and A. Zsednai (Bracknell, United Kingdom) 105

Special Issue: Interfacial Tensiometry. Selected Papers from a Symposium on Recent Progress in Interfacial Tensiometry, held at the Third Chemical Congress of North America, Toronto, Ontario, Canada, 5–10 June 1988

Preface 119
Capillary-wave techniques for the measurement of surface tension and surface viscoelasticity
D. Langevin (Paris, France) 121
An adjustable-resolution surface laser-light scattering spectrometer and its application to the measurement of interfacial tension and viscosity in crude oil systems
R.B. Dorshow and R.L. Swofford (Warrensville Heights, OH, U.S.A.) 133
Automation of axisymmetric drop shape analysis for measurements of interfacial tensions and contact angles
P. Cheng, D. Li, L. Boruvka, Y. Rotenberg and A.W. Neumann (Toronto, Canada) 151
An automated drop shape apparatus and the surface tension of pure water
N.R. Pallas and Y. Harrison (Cleveland, OH, U.S.A.) 169
Determination of line tension from the drop size dependence of contact angles
D. Li and A.W. Neumann (Toronto, Canada) 195
Line tension of sessile drops placed on a phospholipid monolayer at the water–fluorocarbon interface
J.A. Wallace and S. Schürch (Calgary, Canada) 207
Spinning bubble tensiometry of aqueous dipalmitoylphosphatidylcholine and lung surfactant dispersions

J.B. Chung, P.C. Shanks, R.E. Hanneman and E.I. Franses (West Lafayette, IN, U.S.A.) 223
The maximum bubble pressure method of measuring surface tension, revisited
K.J. Mysels (La Jolla, CA, U.S.A.) 241
Surface tensions of viscous and anisotropic fluids
A.H. Alexopoulos and E.I. Franses (West Lafayette, IN, U.S.A.) 263
Automation of the capillary rise technique for measuring contact angles
C.J. Budziak and A.W. Neumann (Toronto, Canada) 279
A dynamic liquid sorption apparatus for studying interactions of microscopic drops in situ on porous substrates
J.F. Oliver and R.C. Forsyth (Mississauga, Canada) 295
A novel strategy for determining line tension from the shape of a liquid meniscus near a stripwise heterogeneous wall
L. Boruvka, J. Gaydos and A.W. Neumann (Toronto, Canada) 307
Adhesion of surfactant-membrane covered droplets: special features and curvature elasticity effects
E. Evans (Vancouver, Canada) 327
Prediction of particle behaviour at solidification fronts by Lifshitz theory: deficiencies of the surface tension components approach for estimating interfactial tensions
E. Moy and A.W. Neumann (Toronto, Canada) 349
Interfacial interactions between self-associated polar liquids and squalane used to test equations for solid-liquid interfacial interactions
F.M. Fowkes, F.L. Riddle Jr, W.E. Pastore and A.A. Weber (Bethlehem, PA, U.S.A.) 367
Solid surface tension: the use of thermodynamic models to verify its determination from contact angles
J.K. Spelt (Toronto, Canada) 389
